

Clearview™

Clearview diffusion screens and film are a transparent rear projection surface offering the floating image effects of holographic/holo screens while featuring superior image performance and no critical angle of projection.

Available in cast diffusion, roll film and as a interactive touch foil, Clearview offers visibility through the screen while providing bright, sharp and vibrant images.

Clearview features an industry leading 160° angle providing unparalleled viewing angle.

Popular applications include through-window interactive touch displays, which benefit from Clearview's high gain, vibrant colors and sharp edges.
