

## SUNSCREEN™

Sunscreen is a revolutionary new rear projection screen developed specifically for window applications and outdoor events.

This unique screen technology has a special louvered optical filter which deflects external light to provide bright, sharp and crystal clear images in daylight conditions.

This is the only projection screen technology that will perform in direct sunlight.

Sunscreen eliminates the problems of blurriness and glare caused by external light and reflection making it ideal for both store windows and external or outdoor displays.

For optimum viewing we recommend images and video to be projected at  $26^{\circ} \pm 5^{\circ}$ .

### Features

- Transmission: 82%
- Peak Gain: 6.7
- Viewing Angle:  $120^{\circ}$
- Thickness: 1mm
- Horizontal half gain (off axis):  $\pm 26^{\circ}$
- Vertical half gain (off axis):  $\pm 20^{\circ}$
- High Contrast

### Benefits

- Light Deflecting Screen Technology
- Sizes 30" to 77" Diagonal
- Custom Sizes and Shapes Available
- Can be applied directly to glass
- Suspended Poster System Available
- Rigid Acrylic Version Available

### Applications

- Through-Window Advertising
- POP/POS Displays
- Outdoor Events
- Exhibit & Trade Shows
- Information/Wayfinding Displays

### Accessories

- Cable Suspension System
- Extrusion Bars
- Aluminum Frames
- Interactive Touch Foil
- Sound Pod Audio
