

ULTRA BLACK HD™

Ultra Black HD is an optical rear projection screen which has been developed for both high end video and home theatre applications. This unique black screen technology recreates images with unsurpassed contrast and resolution (HD quality). The acrylic glass surface provides sharp, crystal clear and life like images resembling that of a high end Plasma / LCD screen. When installed on our weighted cable suspension system the Ultra Black screen offers a very minimalist look and feel, displaying images that appear to be floating in mid air. This technology blends in well with today's contemporary interiors, creating a world where screens become an integral part of the room's décor or their own piece of moving art. For individuals who have a need to be different and a desire for the very latest and innovative technology, this is a must have product.

FEATURES

- » Transmission - 50%
- » Peak gain - 2.4
- » Horizontal half gain - +/-24°
- » Vertical half gain - +/-24°
- » Viewing angle 140°
- » Thickness - 3mm
- » Weight - 3.4kg per M²
- » Colour- black (matt / gloss)

BENEFITS

- » Optical diffusion screen
- » Sizes from 32" to 138"
